Rotary Hook

Stitch Formation

Thread/Needle Guide

Needle Size	Threads
12 (80)	Silk (100wt.) 60 wt., monofilament, mylar, cotton, poly
14 (90)	Silk (100wt.) 60 wt., monofilament, mylar, cotton, poly
16 (100)	60 wt., 50 wt., 40 wt., monofilament, mylar, metallic, cotton, poly
18 (110)	50 wt., 40 wt., 30 wt., metallic, cotton, poly
20 (120)	30 wt., 20 wt., 12 wt. cotton, poly

Tension Quick Start

Bobbin adjustments are minute, like ticks of the clock. Top adjustments can require full turns of the knob.

1. Always adjust bobbin thread tension FIRST.

2. Stitch out to check top tension.

3. If top thread looks like *Diagram A*

Problem: The top thread is too tight. **Solution:** Loosen the top thread tension discs (turn left).

4. If top thread looks like *Diagram B*

Problem: The top thread is too loose. **Solution:** Tighten the top thread tension discs (turn right).
